SUMMARY

QA Engineer with 4+ years in mobile games and AI apps (Playrix, Glam AI). Manual testing of iOS and Android with a focus on monetization, analytics and release stability: subscriptions and in-app purchases, A/B tests and events, APIs, AI features, localization and performance. AI assistants (Claude) for test cases, documentation and automated checks.

Key achievements:
• Quality of weekly iOS releases at Glam AI: top-10 Photo & Video app on the App Store worldwide, 18M installs, 2M MAU.
• Daily Shots improvement: reuse among paying users grew from 7% to 58%.
• Monetization testing at Playrix: in-game purchase improvements brought +10% in purchases.

EXPERIENCE

Jul 2025 — present

AI photo and video editing app

Glam AI — QA Specialist

- Manual testing of the iOS app before weekly releases: functional, regression, integration, smoke and exploratory testing.
- Subscription and monetization testing: paywalls, purchases, free trials, renewals, cancellations, card payments; sandbox purchases, Adapty.
- Testing of AI/ML photo and video features together with the ML and computer vision teams.
- API and server logic testing: Postman, Charles Proxy, Proxyman, JSON.
- Investigation and reproduction of production issues with iOS, backend and ML teams, support and product: Xcode Console, Firebase, Bugsnag, Amplitude.
- AI assistants (Claude) in QA work: code review, test cases, documentation, automated checks.
- Improvement of QA processes and task management in Notion, which sped up the team's work.
- Participation in CI/CD releases: Xcode, TestFlight, GitHub.

GEVORK AKOPIAN

Mobile QA Engineer (iOS / Android · Games & AI)

EXPERIENCE

Oct 2023 — May 2025

Mobile casual games

Playrix — QA Specialist

- LiveOps testing: events and regular updates supporting player growth.
- Monetization and in-game purchase testing.
- Fewer bugs from release to release; build stability control.
- Game testing on iOS, Android and Huawei: server and client logic, release regression.
- Verification of A/B tests and analytics events in Amplitude and Swrve.
- Requirements analysis; test cases, checklists, test plans and bug reports.
- Traffic interception and request modification with Charles Proxy; crash analysis in Sentry.
- Test server and event configuration via Git.

Apr 2023 — Aug 2023

Mobile games

Playgendary — QA Specialist

- Analytics testing: Adjust raw data and Firebase configs.
- 60+ defects found per month as part of KPI.
- Build installation and verification, log collection in Android Studio (adb logcat) and Xcode.
- Test runs in TestRail, bug reports in Asana, work with Git.
- Production releases and post-release monitoring.

Mar 2022 — Apr 2023

Mobile games

DominiGames — QA Engineer

- Intern training; stand-in for the QA Team Lead.
- Functional and non-functional testing on Android and iOS, alpha and beta testing.
- Firebase Analytics verification, test plans and test documentation.
- Project builds in Jenkins; handling user complaints via Helpdesk.

SKILLS & TOOLS

Testing	functional, regression, smoke, exploratory, integration, API, localization, compatibility, performance
Test design	boundary values, equivalence partitioning; test plans, test cases, checklists, bug reports
Platforms	iOS, Android, Huawei; Xcode, Android Studio, TestFlight, 3uTools; adb logcat and Xcode Console logs
API	Postman, Charles Proxy, Proxyman, REST API, JSON
Monetization	subscriptions and in-app purchases, sandbox purchases, Adapty
Analytics	Amplitude, Swrve, Adjust, Firebase, Sentry, Bugsnag; A/B tests
Trackers	Jira, Asana, Notion, TestRail, Qase, Confluence, Coda, HelpShift
Releases	Git, GitHub, Jenkins, CI/CD
AI	Claude: code review, test cases, documentation, automated checks
